Major Headlines

Oil edge higher; U.S.-Iran conflict worries overshadow large
Oil prices edged higher Wednesday, holding just below seven-month highs touched earlier this week as persistent U.S.-Iran tensions offset bearish signals from a large U.S. crude stock build and fresh trade uncertainty. At 06:05 ET (11:05 GMT), Brent Oil Futures expiring in April rose 0.6% to \$71.02 per barrel and West Texas Intermediate (WTI) crude futures jumped 0.5% to \$65.96 per barrel. Both contracts declined 1% on Tuesday amid fresh U.S. trade tariff jitters. [see more...](#)

Gold prices rebound on tariff jitters; silver, platinum and copper rally

Gold prices rose Wednesday, rebounding after the previous session's weakness, as investors assessed the impact of newly imposed U.S. tariffs, and awaited U.S.-Iran talks later this week. At 04:25 ET (09:25 GMT), Spot gold was up 0.9% at \$5,187.64 an ounce and U.S. Gold Futures gained 0.6% to \$5,206.10/oz. The yellow metal fell 1.6% on Tuesday after four straight sessions of gains. The U.S. began collecting a temporary 10% global import tariff on Tuesday, with the Trump administration working to increase the levy to 15%. [see more...](#)

U.S. stock futures edge higher; Home Depot earnings, trade tariffs in focus

U.S. stock index futures rose slightly Tuesday, bouncing after the previous session's selloff as investors digested heightened uncertainty over global trade and AI disruptions fears ahead of key Nvidia earnings. At 05:45 ET (10:45 GMT), Dow Jones Futures rose 60 points, or 0.1%, S&P 500 Futures gained 13 points, or 0.2%, and Nasdaq 100 Futures advanced 66 points, or 0.3%. The main averages on Wall Street sank in the prior session, dragged down by ongoing worries [see more...](#)

USD/JPY Price Forecast: Bullish bias builds above 155.00 support

USD/JPY trades on the front foot on Tuesday as the Japanese Yen (JPY) weakens broadly after reports that Japan's Prime Minister Sanae Takaichi signaled caution over further Bank of Japan (BoJ) rate hikes during a meeting with Governor Kazuo Ueda last week. However, the pair is struggling to extend gains as the US Dollar (USD) eases from its intraday highs. At the time of writing, USD/JPY trades around 155.70 after hitting a daily high of 156.28, up nearly 0.64%. [see more...](#)

EUR/USD trades flat near 1.1780 even as US Dollar trades firmly

The Greenback remains on the front foot as market participants expect uncertainty sparked due to the United States (US) Supreme Court (SC) blocking President Donald Trump's tariff policy will be short-lived, as there are several ways to keep additional import duties in place. Even Trump has announced 15% global tariffs to offset the same, and has threatened steeper levies in case countries refrain from honouring trade deals in the wake of SC's ruling. [see more...](#)

Dollar Index (DXY) Set to End February on a Positive Note

US Dollar (USD) claws back half of its early losses after gaining a temporary ground near 97.40 during the European trading session on Monday. During the press time, the US Dollar Index (DXY), which tracks the Greenback's value against six major currencies, trades 0.2% lower to near 97.60. Earlier in the day, the US Dollar faced intense selling pressure as investors turned anxious over the United States (US) trade policy outlook, following the Supreme Court (SC) ruling against President Donald Trump's tariff policy.
